

DIGITAL MARKETING PROPOSAL

THE PARTNER

JULY 7TH, 2020

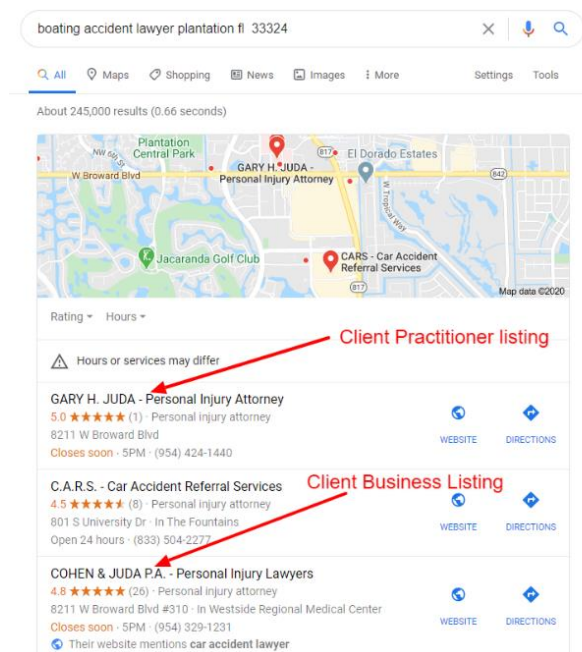

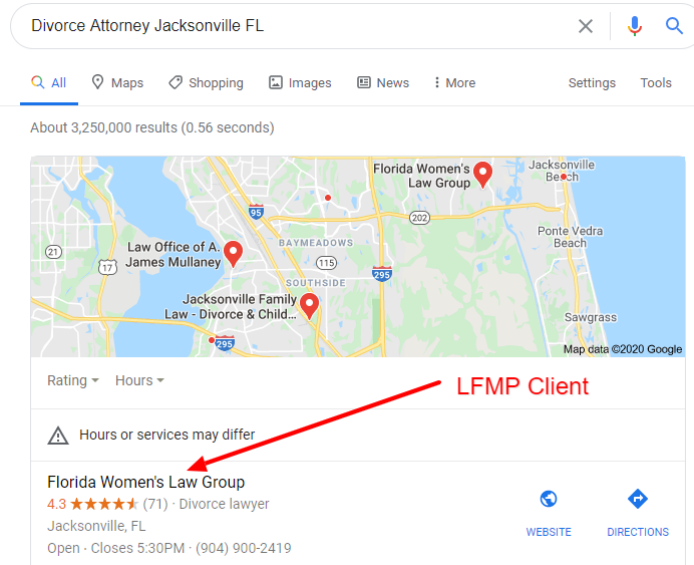

Thanks for taking the time to learn more about how today's digital technology can help you grow your practice and increase your profits via online marketing.

Pursuant to our digital marketing strategy session and after further consideration I am confident we can help you achieve your goals. Our core team has over 75 years of digital marketing experience and we have done all the heavy lifting for you, so you can be assured you are making the right decision when choosing Law Firm Marketing Pros. As discussed in our meeting, I believe a systemic approach utilizing the latest methodologies would be best for you. We have proven time and time again we achieve the greatest success of lead generation and conversions when all of the services are implemented simultaneously because there is a synergistic “force multiplier” effect.

Our proprietary Digital Supremacy System leverages the latest in Digital Marketing to create an impressive digital brand and footprint resulting in the most cost effective and efficient program available today. The objective is to help you increase your leads and convert them into new clients and thus grow your revenue and increase profitability by fully maximizing super qualified lead flow online. Below is a visual of the holistic system we have developed called “The Digital Supremacy System”™. It outlines our roadmap to help you fully understand how your lead flow progresses as you grow your law firm.

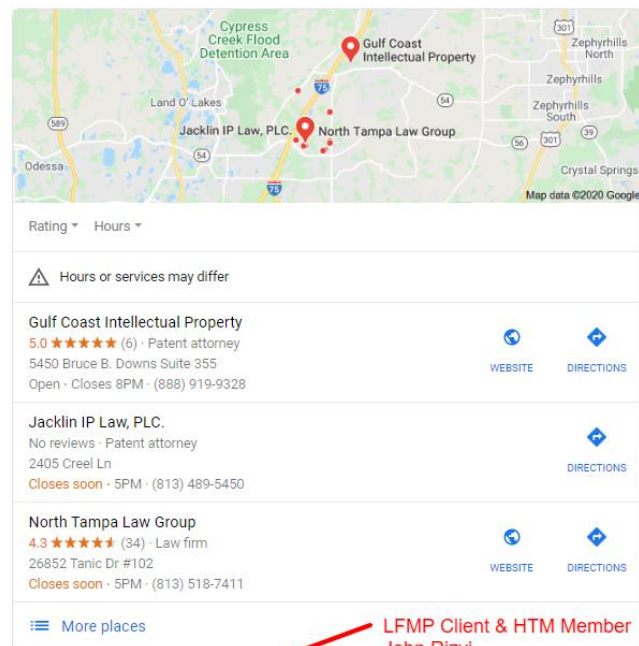

Local SEO/Google My Business “Map Listing” & Directory Optimization – The keys to getting ranked on page 1 of the Google My Business, “GMB” or Google Map section for your most important keywords in your area is to; a) have a properly built and optimized GMB listing, and to be listed with consistent information throughout the online ecosystem and to be accurately listed on the important and relevant online directory sites and data aggregators. Our team will claim, optimize and build out your map and directory listings on popular map / directory sites such as Google My Business (a.k.a. Google Map Listing), Bing Local Listing, Yahoo Local Listing, Yelp, CitySearch, AVVO, Lawyers.com and many other local directories. Additionally, we will claim, build and optimize your listings on the primary Data aggregators like Infogroup, Localeze, Foursquare and Factual. We will also do the necessary work to monitor and correct any Name, Address & Phone Number inconsistencies in the ecosystem. 1 Location your choice, or you can add a second location for only \$595/month more, Centennial & Denver.

Google My Business “Map Listing” Practitioner Listing – Includes everything in above paragraph for Google Individual practitioner listing for **1 Partner (April D. Jones)**

Search Engine Optimization - Our SEO Local Search Supremacy Program (LSS) is a proprietary platform developed to increase organic search engine indexing and drive organic visitors to lead generation and/or sales and ecommerce pages. Prior to the invention of LSS it was near impossible to rank high on page one of Google for cities where you did not have an address. And if you were to embark on such a program, It would be extremely expensive to the point where it would be difficult to realize any ROI. Until now, we accomplish this with an increase in organic SEO indexing by generating a variety of pages that are unique in content, title and URL for the purpose converting online sales and/or driving customers to physical stores. Our service includes the implementation and setup and custom configuration of our WordPress plugin which will allow for the creation of individual funnel pages each targeted at specific stores & regions.

Fulfillment is by Keyword bundle and number of cities. Each Keyword Bundle will have its own main landing page(s) which will serve as the basic for the SEO automation process. In addition, our tool can create individual state, city and store level pages for each brand. An accompanying site map will be created by our plugin for submission to Google, etc. for indexing and crawling to aid in the organic growth. 1 Case Type (1- Keyword Bundle) for 10 Cities. A Keyword bundle refers to a group of keywords that have the same primary Keyword but include various permutations of the keyword that proved a recordable search volume for a given geographic location or city. For example, all permutations of said keyword for and each city selected. I.E., Bankruptcy Attorney, Bankruptcy Lawyer, Bankruptcy Law Firm, all plural versions thereof and including city name and including "The Best" and "Near me" and "Local".

IP Law Firm In Wesley Chapel

IP Law Firm in Wesley Chapel. ... be granted. Drafting effective patents requires patent attorneys to have a unique combination of science, law and language.

Link Building & Content Development - Once design, development, content and on-page SEO work is complete, the only way to get your site to rise above the competition is by building authority and relevance with quality inbound links. We will systematically develop inbound links from quality sources on your behalf via Competitive Link Acquisition, Article/blog Distribution, Video Distribution, Social Media Bookmarking and a variety of other sources. We will work diligently toward top page placement on Google, Yahoo and Bing in the Organic (non Pay-Per-Click) section of the Search Engines for your relevant Keywords in and around the CITY Area. We

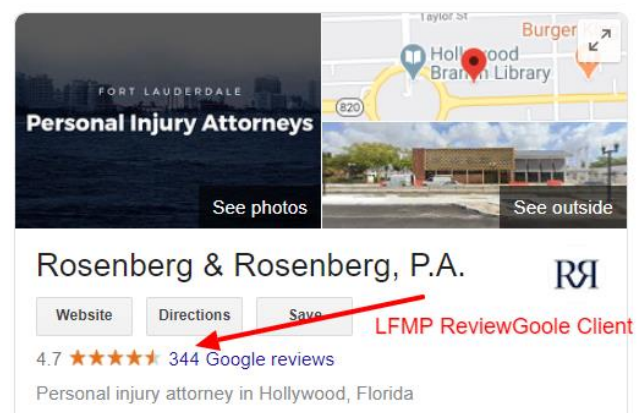

will write and syndicate a quarterly press release. For Blogs, the Client will write the blogs and we will post and syndicate them.

Pay-Per-Click Campaign Management - There are few things more powerful than the combination of effective design, strong copy, SEO & Google Ads. Let's face it, you want high-quality leads on a consistent basis and you need results sooner than later. By rolling out an effective pay-per-click campaign we can start to generate highly qualified leads right out of the gates as soon as your new website is complete. Your monthly Click budget is recommended to be \$2,500/month to start.

Multi-channel Retargeting - Driving qualified traffic to your website is only the first step in converting the visitor to a client. The medium conversion rate across all industries is 2.35%. That means you have to bring them back. Retargeting does just that, it is online targeted advertising by which ads are targeted to consumers based on their previous internet actions, IE. a search query or click to a website. Retargeting identifies and tags online users by including a pixel within the target webpage or email, which sets a cookie in the user's browser. Once the cookie is set, the advertiser is able to show display ads to that user elsewhere on the internet as they browse and search via an ad exchange.

There are a lot of moving parts involved in running an effective PPC campaign. We will manage the entire process for you, including setting up the ad groups, selecting the proper keywords, writing effective text ads and mapping everything to the most compelling landing page. On an ongoing basis we will review and update your text ads, keywords, bids and landing pages to maximize conversion and return on investment.

ReviewGoole Reputation Marketing, Management, Monitoring & Syndication - Your online reputation is critical to the success or failure of your internet marketing efforts. If you are investing in digital marketing to get people to find you and you have no online reputation or a bad reputation (3 stars or less) your potential customers will pass you by and pick your competitor. To that end, we will be implementing a reputation monitoring and management system, called ReviewGoole™, to alert you as new reviews are posted (Good, Bad or Indifferent). This way we can be aware of and address the occasional negative review & syndicate the positive reviews to share the good word. Concurrent to that we will be actively generating real reviews from your past and present client with our fully automated system. Finally, the ReviewGoole™ "positive reviews" syndication tool will be setup to automatically post the good reviews on

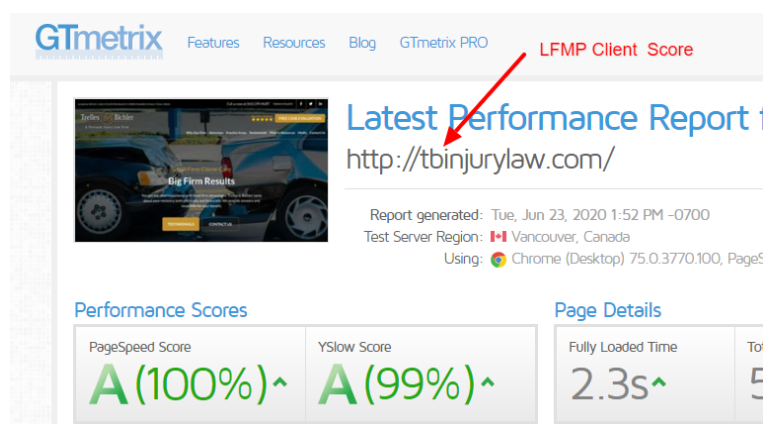

your website and social media profiles and then automatically send an email request to your client to ask them to post the review in the online ecosystem, thus making your reviews viral.

Hyper-Optimized Website Hosting, Monitoring & Maintenance

Features of LFMP Hyper-Optimized WordPress Hosting

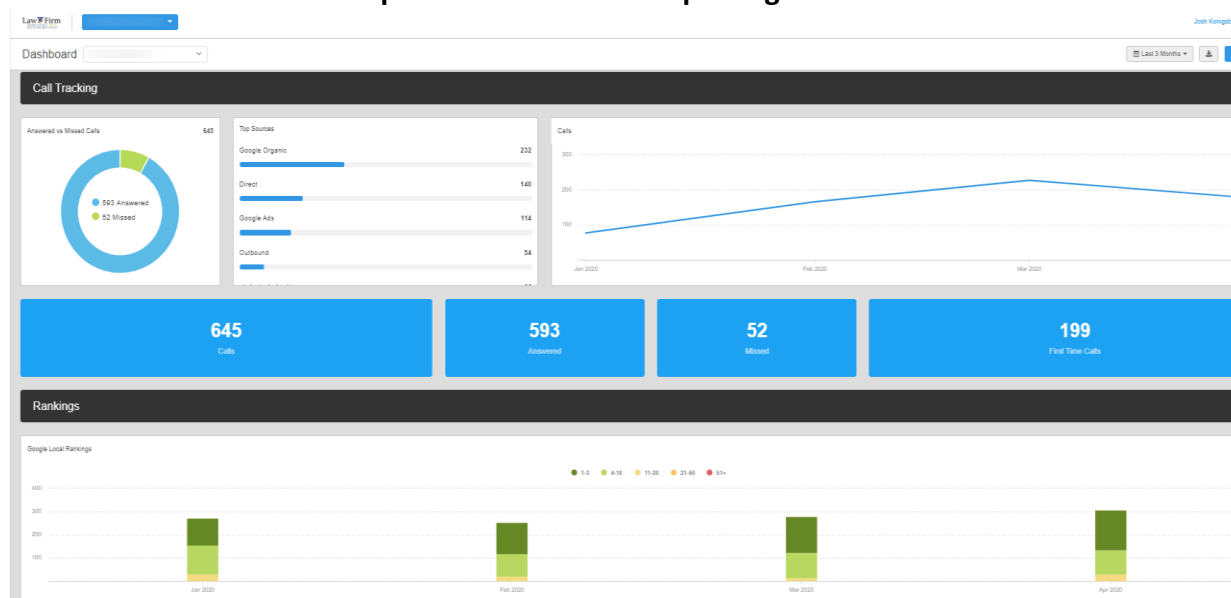

- Guaranteed 90+ GTMetrix and PageSpeed Scores.
- Free Demo through Staging Environment - Check Performance First.
- Offsite Backup for 90 Days.

- Response Time of Under 60 Minutes during Business Hours, and within 4 hours during Non-Business Hours.

Track, Measure & Quantify - The goal of this program is to help you grow. In order to ensure we are delivering on that objective and to help you quantify the results of our efforts we will put the following tracking mechanism in place:

- **Traffic & Search Trends** - We will install Google Analytics on your website so that you can see exactly how many people are visiting on a monthly basis, what words they typed in to get to the site, what pages they went to, etc. You will receive this report every month via email.
- **SEO Page Placement Report** - We will set up a report with the core keywords that we are looking to obtain placement for and systematically track that placement on Google, Yahoo and Bing.
- **Call Tracking** - We will setup call tracking and recording broken down by SEO vs. PPC. With this tracking in place we will be able to determine exactly how many inbound calls are coming into your office monthly via the Internet and drill down by SEO vs. PPC. You will even be able to listen to these calls to truly quantify the results & ROI.

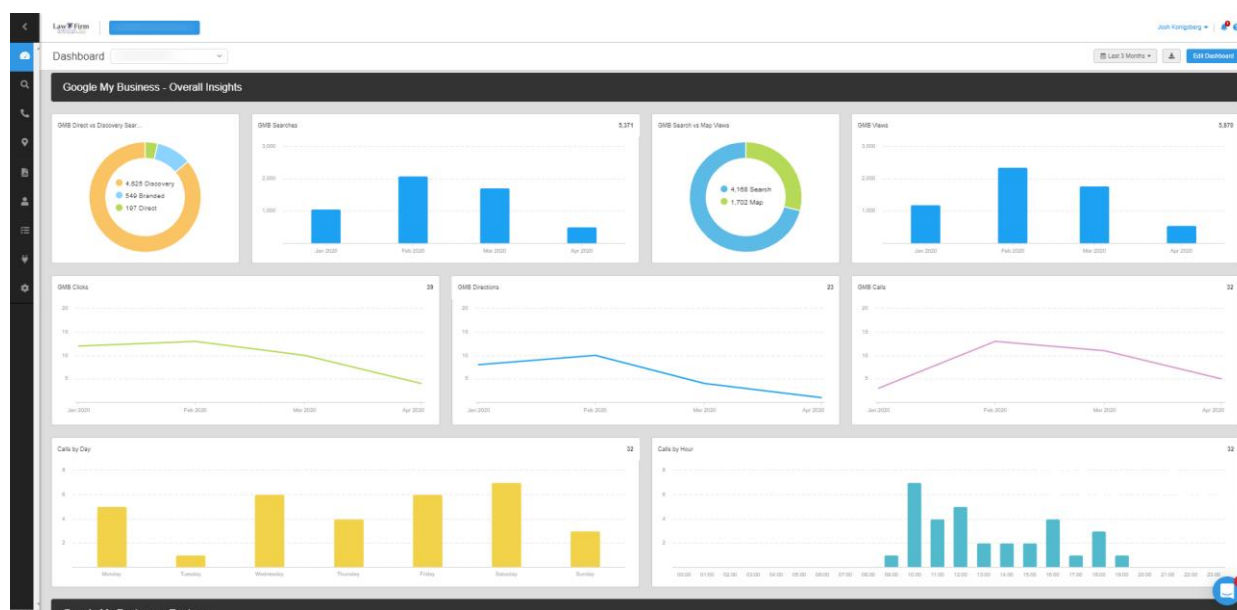

Sample of a Real Clients Reporting Dashboard

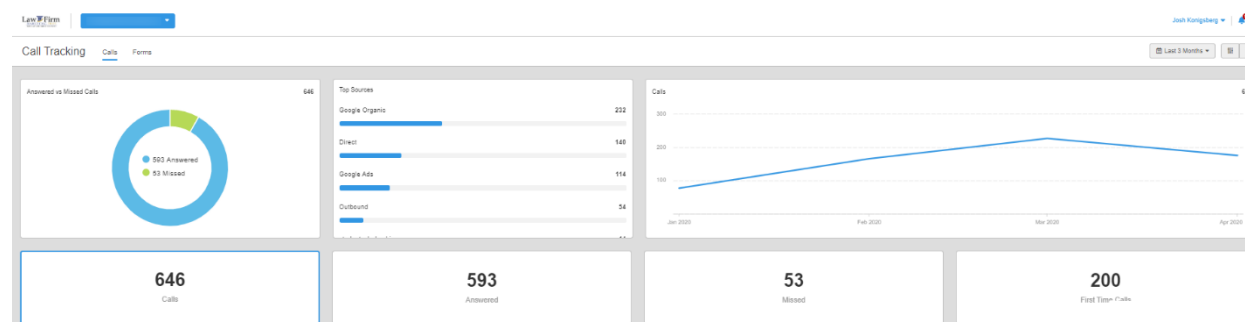

We will set you up with access to your very own K.P.I. (Key Performance Indicator) tracking dashboard that will help you keep a pulse on the most important metrics.

- Total Number of Leads Generated (Calls Tracked + Web Form Submissions)
- Total Investment
- Average Cost Per Lead Generated

Sample of a Real Clients GMB Analytics
